Operations office: Via Livio 14, 6830 Chiasso, Switzerland
Registered office: Via alla Campagna 4, 6900 Lugano, Switzerland

Main Features

No Additional Costs

No integration of third-party modules or API keys is required. This eliminates extra costs for external components and additional platforms.

Result-Oriented Design

Built to be intuitive and easy to use, providing immediate and comprehensive insights.

Dark Web Search

Advanced and secure search capabilities within the Dark Web. Search for wallets, marketplaces, and any known keywords.

Curriculum Analysis

Identify and extract valuable information from resumes and professional profiles.

Work Intelligence

Starting from a name, tax code, or VAT number, the system retrieves company data and job positions. The algorithm enables both forward and reverse searches across individuals and organizations.

LinkedIn Intelligence

Search using a nickname across 600+ platforms—no personal profiles required.

Social Media Analysis

Using a nick name, more than 600 directly searchable platforms are scanned without using personal profiles.

Global Search

Ideal when limited data is available. Filters and prioritizes relevant investigative information.

Identikit

Reconstruct identities by generating detailed subject profiles (age, appearance, and key attributes), while identifying phone number ownership and associated data.

Advanced Document Search

Perform deep searches within documents—not limited to file names.

Judicial Document Search

Dedicated algorithm for locating and analyzing judicial records.

Crypto Wallet Intelligence

Identify crypto wallets by scanning domains and subdomains. Detect hidden wallets and check their presence across the Dark Web and other platforms.

Company & People Intelligence

Track the history of a domain since its creation. Identify associated individuals, emails, subdomains, certificates, and more.

Image Finder

Search for images of people, locations, and objects.
